## Part I. The advent of long duration, ultra-high precision photometry of stars from space

<b>Introduction</b>	3
<b>I.1 - The general framework</b> . . . . .	5
A. Baglin	
<b>I.2 - Seeds take root in Europe</b> . . . . .	7
M. Fridlund, I. Roxburgh	
<b>I.3 - The CoRoT story</b> . . . . .	11
A. Baglin, T. Lam-Trong, O. Vandermarcq, C. Donny, S. Burgaud	
<b>I.4 - Across the Atlantic: Canada's MOST</b> . . . . .	17
J. M. Matthews	
<b>I.5 - In the United States: the long way to Kepler</b> . . . . .	21
W. Borucki	

## Part II. The CoRoT legacy data

<b>Introduction</b>	27
<b>II.1 - The CoRoT observations</b> . . . . .	29
A. Baglin, S. Chaintreuil, O. Vandermarcq	
<b>II.2 - Description of processes and corrections from observation to delivery</b> . . . . .	41
M. Ollivier, A. Deru, S. Chaintreuil, A. Ferrigno, A. Baglin, J.-M. Almenara, M. Auvergne, S. Barros, F. Baudin, P. Boumier, P.-Y. Chabaud, H. Deeg, P. Guterman, L. Jorda, R. Samadi, T. Tuna	
<b>II.3 - Exposure-based algorithm for removing systematics out of the CoRoT light curves</b> . . . . .	55
P. Guterman, T. Mazeh, S. Faigler	
<b>II.4 - The "ready to use" CoRoT data</b> . . . . .	61
S. Chaintreuil, A. Deru, F. Baudin, A. Ferrigno, E. Grolleau, R. Romagnan	
<b>II.5 - Where to find the CoRoT data?</b> . . . . .	109
S. Chaintreuil, A. Bellucci, F. Baudin, P. Ocvirk, H. Ballans, G. Landais, F. Ochsenbein, J.-L. Orcesi	

## Part III. Major scientific achievements in planetary science

<b>Introduction</b> M. Deleuil	115
<b>III.1 - Transit features detected by the CoRoT/Exoplanet Science Team</b> . . . . . M. Deleuil, C. Moutou, J. Cabrera, S. Aigrain, F. Bouchy, H. Deeg, P. Bordé, the CoRoT Exoplanet team	117
<b>III.2 - Activity modelling and impact on planet's parameters</b> . . . . . <b>The case of CoRoT-7</b> S. C. C. Barros, R. D. Haywood, M. Deleuil	123
<b>III.3 - CoRoT's planets: A family portrait</b> . . . . . T. Guillot, M. Havel	129
<b>III.4 - CoRoT planet host stars</b> . . . . . M. Fridlund, G. Bruno, M. Deleuil, D. Gandolfi, the CoRoT CEST team	133
<b>III.5 - Stellar classification in CoRoT faint stars fields</b> . . . . . C. Damiani, J.-C. Meunier, C. Moutou, M. Deleuil, F. Baudin	137
<b>III.6 - Exploration of the brown dwarf regime around solar-like stars by CoRoT</b> . . . . . Sz. Csizmadia	143
<b>III.7 - Planets orbiting stars more massive than the Sun</b> . . . . . E. W. Guenther, D. Sebastian, D. Gandolfi, P. Montañés-Rodríguez, St. Geier, Sz. Csizmadia, F. Cusano, H. J. Deeg, M. Fridlund, S. Grziwas, U. Heber, C. Heuser, F. Rodler, L. Tal-Or, the CoRoT-team	149
<b>III.8 - Exoplanets versus brown dwarfs: The CoRoT view and the future</b> . . . . . J. Schneider	157
<b>III.9 - Star-planet Interactions</b> . . . . . A. F. Lanza, S. Ferraz-Mello	161
<b>III.9-1 - Investigating star-planet interactions with CoRoT</b> . . . . . A. F. Lanza	163
<b>III.9-2 - Tidal evolution of CoRoT massive planets and brown dwarfs and of their host stars</b> . . . . . S. Ferraz-Mello	169

## Part IV. Decisive breakthroughs for stellar physics

<b>Introduction</b>	179
K. Belkacem	
<b>IV.1 - Insights on the internal structure of stars as provided by seismology</b> . . . . .	181
<b>Classical pulsators and Solar-like oscillations</b>	
A. Grottsch-Noels, S. Deheuvels	
<b>IV.2 - Pulsating red giant stars</b> . . . . .	197
<b>Ensemble asteroseismology and Asteroseismology of stellar populations in the Milky way</b>	
B. Mosser, A. Miglio	
<b>IV.3 - The wealth of stellar variability</b> . . . . .	209
<b>Stellar rotation and activity, Binaries and Stars with disks</b>	
F. Baudin, C. Maceroni, S. H. P. Alencar	

## Part V. CoRoT paved the road to the future

<b>Introduction</b>	229
<b>V.1 - Lessons learned from CoRoT</b> . . . . .	231
T. Lam-Trong	
<b>V.2 - CoRoT heritage in future missions</b> . . . . .	237
M. Ollivier, D. Tiphène, R. Samadi, P. Levacher	
<b>V.3 - Present and future space missions for ultra-precision photometry</b> . . . . .	241
A. P. Hatzes, W. W. Weiss, H. Rauer, A. Grottsch-Noels
