## Part I - Descriptions

### CHAPTER 1

---

One-Component Chemical Systems: CaO, SiO <sub>2</sub> , Al <sub>2</sub> O <sub>3</sub> and Fe Oxides .....	3
1.1    CaO .....	3
1.1.1    Introduction .....	3
1.1.2    Mineralogy, Structure and Stability .....	3
1.1.3    Properties and Applications .....	4
1.2    SiO <sub>2</sub> .....	5
1.2.1    Introduction .....	5
1.2.2    Mineralogy .....	5
1.2.3    Structure and Stability .....	6
1.2.4    Properties and Applications .....	6
1.3    Al <sub>2</sub> O <sub>3</sub> .....	7
1.3.1    Introduction .....	7
1.3.2    Mineralogy .....	8
1.3.3    Structure and Stability .....	8
1.3.4    Properties and Applications .....	9
1.4    Fe Oxides .....	10
1.4.1    Introduction .....	10
1.4.2    Mineralogy .....	11
1.4.3    Structure and Stability .....	11
1.4.4    Synthesis .....	14
1.4.5    Properties and Applications .....	14

### CHAPTER 2

---

Binary Chemical Systems .....	17
2.1    CaO–SiO <sub>2</sub> System .....	17
2.1.1    Introduction .....	17
2.1.2    Mineralogy .....	17

2.1.3	Structure, Polymorphism and Solid Solution . . . . .	18
2.1.4	Stability and Phase Diagram of CaO–SiO <sub>2</sub> System . . . . .	25
2.1.5	Synthesis of Calcium Silicates . . . . .	27
2.2	Al <sub>2</sub> O <sub>3</sub> –SiO <sub>2</sub> System . . . . .	33
2.2.1	Introduction . . . . .	33
2.2.2	Mineralogy . . . . .	33
2.2.3	Structure, Polymorphism and Solid Solutions . . . . .	33
2.2.4	Stability and Phase Diagram . . . . .	37
2.2.5	Synthesis of Alumino-Silicates . . . . .	41
2.3	Al <sub>2</sub> O <sub>3</sub> –Fe Oxides System . . . . .	44
2.3.1	Introduction . . . . .	44
2.3.2	Mineralogy . . . . .	44
2.3.3	Structure, Polymorphism and Solid Solution . . . . .	44
2.3.4	Stability and Phase Diagram . . . . .	45
2.3.5	Synthesis of Iron Aluminates . . . . .	48
2.4	CaO–Al <sub>2</sub> O <sub>3</sub> System . . . . .	48
2.4.1	Introduction . . . . .	48
2.4.2	Mineralogy . . . . .	49
2.4.3	Structure, Polymorphism and Solid Solution . . . . .	49
2.4.4	Stability and Phase Diagram . . . . .	55
2.4.5	Synthesis of Calcium Aluminates . . . . .	57
2.5	SiO <sub>2</sub> –Fe Oxides System . . . . .	62
2.5.1	Introduction . . . . .	62
2.5.2	Mineralogy . . . . .	62
2.5.3	Structure, Polymorphism and Solid Solution . . . . .	63
2.5.4	Liquid FeO–Fe <sub>2</sub> O <sub>3</sub> –SiO <sub>2</sub> . . . . .	66
2.5.5	Stability and Phase Diagram of the FeO–Fe <sub>2</sub> O <sub>3</sub> –SiO <sub>2</sub> System . . . . .	67
2.5.6	Synthesis of Iron Silicates . . . . .	71
2.6	CaO–Fe Oxides System . . . . .	72
2.6.1	Introduction . . . . .	72
2.6.2	Mineralogy . . . . .	72
2.6.3	Structure, Polymorphism and Solid-Solutions . . . . .	72
2.6.4	Stability and Phase Diagram . . . . .	75
2.6.5	Synthesis of Calcium Ferrite . . . . .	81

---

### CHAPTER 3

Ternary Chemical Systems . . . . .	83
3.1 General Introduction . . . . .	83
3.2 CaO–Al <sub>2</sub> O <sub>3</sub> –SiO <sub>2</sub> System . . . . .	83
3.2.1 Ternary Constituents of the CaO–Al <sub>2</sub> O <sub>3</sub> –SiO <sub>2</sub> System . . . . .	83
3.2.2 Mineralogy . . . . .	84
3.2.3 Structure and Solid Solutions . . . . .	85
3.2.4 Stability and Phases Diagrams (At One Atmosphere) . . . . .	90
3.2.5 Compounds Obtained in Special Conditions . . . . .	97
3.2.6 Stability Relative to Temperature or Pressure and Both . . . . .	98

3.2.7	Thermodynamic Models . . . . .	99
3.2.8	Synthesis of Calcium Silicoaluminate . . . . .	101
3.3	Al <sub>2</sub> O <sub>3</sub> –SiO <sub>2</sub> –Fe Oxides . . . . .	103
3.3.1	Introduction . . . . .	103
3.3.2	Mineralogy . . . . .	103
3.3.3	Structure and Solid Solution . . . . .	103
3.3.4	Stability and Phase Diagram . . . . .	104
3.3.5	Synthesis . . . . .	108
3.4	CaO–SiO <sub>2</sub> –Fe Oxides . . . . .	109
3.4.1	Introduction . . . . .	109
3.4.2	Mineralogy . . . . .	109
3.4.3	Structure and Solid Solution . . . . .	110
3.4.4	Stability and Phase Diagrams in Air . . . . .	112
3.4.5	Stability and Phase Diagram in the CaO–SiO <sub>2</sub> –FeO System . . . . .	117
3.4.6	CaO–SiO <sub>2</sub> –FeO <sub>x</sub> System at Various Oxygen Pressures . . . . .	126
3.4.7	Model . . . . .	131
3.4.8	Preparation and Synthesis . . . . .	132
3.5	CaO–Al <sub>2</sub> O <sub>3</sub> –Fe Oxides . . . . .	134
3.5.1	Introduction . . . . .	134
3.5.2	Mineralogy . . . . .	134
3.5.3	Structure and Solid Solutions . . . . .	135
3.5.4	Stability and Phase Diagrams . . . . .	140
3.5.5	Liquidus in Reducing Atmosphere . . . . .	143
3.5.6	Model of the System . . . . .	145
3.5.7	Formation and Synthesis . . . . .	145

## CHAPTER 4

---

	Quaternary Chemical Systems . . . . .	147
4.1	Introduction . . . . .	147
4.1.1	Principle of Phase Equilibrium in a Quaternary System . . . . .	147
4.2	CaO–SiO <sub>2</sub> –Al <sub>2</sub> O <sub>3</sub> –Fe <sub>2</sub> O <sub>3</sub> System in Air . . . . .	152
4.2.1	Quaternary Constituents of the CaO–SiO <sub>2</sub> –Al <sub>2</sub> O <sub>3</sub> –Fe Oxides System . . . . .	152
4.2.2	Mineralogy . . . . .	153
4.2.3	Mineralogy Structure Stability . . . . .	158
4.2.4	Formation and Synthesis . . . . .	173
4.3	CaO–Al <sub>2</sub> O <sub>3</sub> –SiO <sub>2</sub> –FeO System . . . . .	173
4.3.1	Introduction . . . . .	173
4.3.2	Ternary Systems Located Within the CaO, Al <sub>2</sub> O <sub>3</sub> , SiO <sub>2</sub> , FeO Tetrahedron . . . . .	173
4.3.3	Binary Systems . . . . .	181
4.3.4	Crystallized Solids . . . . .	182
4.3.5	Univariant Lines and Quaternary Invariant Points . . . . .	182
4.3.6	2CaO·SiO <sub>2</sub> –CaO·SiO <sub>2</sub> –Gehlenite–FeO Quaternary System . . . . .	183

---

CHAPTER 5

Quinary Chemical Systems . . . . .	189
5.1 Introduction – Presentation of Quinary Data . . . . .	189
5.2 CaO–SiO <sub>2</sub> –Al <sub>2</sub> O <sub>3</sub> –FeO–Fe <sub>2</sub> O <sub>3</sub> System . . . . .	189
5.2.1 Stability and Phase Diagrams . . . . .	189
5.2.2 Conclusions . . . . .	192
References of Part I . . . . .	193

**Part II - Applications**

---

CHAPTER 6

Applications to Hydraulic Binders . . . . .	211
6.1 General Introduction . . . . .	211
6.2 Portland Cements (PC) . . . . .	212
6.2.1 Characteristics . . . . .	212
6.2.2 PC Applications . . . . .	220
6.2.3 Conclusions – Prediction of the Properties . . . . .	226
6.3 Calcium Aluminate Cements (CAC) . . . . .	227
6.3.1 CAC Characteristics . . . . .	227
6.3.2 CAC Applications . . . . .	234
6.4 Special Cements . . . . .	237
6.4.1 Fast-Setting Cements . . . . .	237
6.4.2 Geopolymers . . . . .	243
6.4.3 Oil Well Cements . . . . .	246
6.4.4 Expansive Cement . . . . .	251
6.4.5 Dental Cements . . . . .	253
6.4.6 Glass Cements . . . . .	259

---

CHAPTER 7

Application to Metal Refining . . . . .	261
7.1 General Introduction . . . . .	261
7.2 Slags from Iron and Steel Industry . . . . .	261
7.2.1 Blast Furnace Slags (BFS) . . . . .	261
7.2.2 Converter Slags (Basic Oxygen Process or LD processing) . . . . .	266
7.2.3 EAF Slags: High Carbon Steel . . . . .	269
7.2.4 Ladle Slag (Secondary Metallurgy) – Stainless – High Alloy Steel Production . . . . .	269
7.2.5 Refining Under Reducing Slag . . . . .	270
7.3 Formation and Properties of Liquid Slags . . . . .	271
7.4 Slags from Non Ferrous Industry . . . . .	272
7.4.1 Copper Slag . . . . .	272
7.4.2 Silico-Manganese Slag . . . . .	272

---

**CHAPTER 8**

Application to Refractory Materials . . . . .	275
8.1 Introduction . . . . .	275
8.2 Raw Materials Based on $\text{Al}_2\text{O}_3$ and $\text{SiO}_2$ . . . . .	276
8.2.1 Natural Raw Materials . . . . .	276
8.2.2 Synthetic Raw Material . . . . .	277
8.3 Applying Refractory Materials . . . . .	278
8.3.1 Brick and Monolithic Refractories . . . . .	278
8.3.2 Refractory Cement and Mortar . . . . .	281
8.4 Refractories Consuming Industry . . . . .	286
8.4.1 Iron and Steel Industry . . . . .	286
8.4.2 Non-Ferrous Metal Industry . . . . .	287
8.4.3 Cement Industry . . . . .	287
8.4.4 Whiteware, Traditional Ceramic Industry . . . . .	288
8.4.5 High-Tech Ceramic Industry . . . . .	288
8.4.6 Glass Industry . . . . .	288

---

**CHAPTER 9**

Application of the Glassy Products . . . . .	291
9.1 Introduction . . . . .	291
9.2 Structure of Glass . . . . .	292
9.3 Classification of Glass Products Containing $\text{CaO}$ , $\text{Al}_2\text{O}_3$ , $\text{SiO}_2$ and Fe Oxides . . . . .	293
9.4 Products, Chemistry and Process . . . . .	294
9.4.1 High Silica Glass – Vycor Glass . . . . .	294
9.4.2 Soda-Lime Glass . . . . .	295
9.4.3 Sodium Borosilicate – Glass Fibres . . . . .	295
9.4.4 Aluminosilicate Glass . . . . .	297
9.4.5 Special Applications . . . . .	299

---

**CHAPTER 10**

Application of Ceramic Products . . . . .	303
10.1 Introduction to Ceramics . . . . .	303
10.2 Structure of Ceramics . . . . .	303
10.2.1 Processing of Manufacture . . . . .	303
10.2.2 Shaping . . . . .	304
10.2.3 Physico-Chemical Changes During Firing . . . . .	305
10.3 Classification of Ceramic Products Containing $\text{CaO}$ , $\text{SiO}_2$ , $\text{Al}_2\text{O}_3$ and Fe Oxides . . . . .	305
10.3.1 Introduction . . . . .	305
10.3.2 Traditional Ceramics . . . . .	305
10.3.3 Ceramics in the Construction Sector Ceramics . . . . .	312
10.3.4 High Technology Ceramics . . . . .	313

**CHAPTER 11**

---

Application as Fillers . . . . .	315
11.1 General Introduction . . . . .	315
11.2 Mono-Component . . . . .	317
11.2.1 Calcium Oxide . . . . .	317
11.2.2 SiO <sub>2</sub> . . . . .	318
11.2.3 Alumina . . . . .	319
11.2.4 Fe oxides . . . . .	320
11.3 Multi-Components By-Products from Industrial Process . . . . .	321
11.3.1 Slags . . . . .	321
11.3.2 Fly Ashes . . . . .	324
11.3.3 Red Mud (KUR 1997) . . . . .	326
11.3.4 Cement Kiln Dust (CKD) . . . . .	327
11.4 Multi-Components from Natural Origin . . . . .	328
11.4.1 Natural Pozzolans . . . . .	328
11.4.2 Metakaolin . . . . .	330
11.4.3 Rice Husk Ashes (RHA) . . . . .	331
11.4.4 Wollastonite . . . . .	332
References of Part II . . . . .	335
