Bernard Jacrot	v
Introduction. Why write a history of the ILL?	vii
1. Pre-history	1
1.1. The situation in Europe	4
1.2. A new idea	11
2. Portraits of three founders of the ILL	17
2.1. Jules Horowitz (1921-1995)	17
2.2. Heinz Maier-Leibnitz (1911-2000)	21
2.3. Louis Néel (1904-2000)	28
3. Why invest so much money in a source of neutrons?	33
3.1. The interaction of neutrons with matter	34
3.2. Neutrons and condensed matter	36
3.3. Nuclear and fundamental physics	43
3.4. Neutrons are indeed indispensable!	44
4. The negotiations	45
4.1. The neutron source	46
4.2. The future users	51
4.3. The contract	52
5. The construction of the reactor and the scientific groups	59
5.1. The first instruments	64
5.2. The construction of the reactor	72
5.3. The link between the ILL management and the project group	80
Portfolio of some typical ILL instruments in 2018	96
6. The start of research activities and the arrival of the British	103
6.1. The start of research activities	103
6.2. Further developments in neutron optics	107
6.3. The arrival of the British	108
7. Maturity	113
7.1. The EMBL	115
7.2. The ESRF	116
7.3. The problem of schools	119

7.4. The evolution of the ILL and its problems	120
7.5. Modernisation of equipment	123
8. The dark years	127
8.1. The reconstruction of the reactor	127
8.2. The partial withdrawal of the British and the consequences	132
8.3. Supply of enriched uranium	135
9. Consolidation and the future	137
9.1. The millennium	137
9.2. The reorganisation of the ILL	138
9.3. Some figures	138
10. Conclusion: an appraisal	141
10.1. The Franco-German Cooperation	141
10.2. The scientific record	146
10.3. The future for the ILL	150
11. The ILL between 2005 and 2018	153
11.1. Introduction	153
11.2. Ambitious improvement plans	154
11.3. Complying with more demanding safety regulations	158
11.4. Funding the present and the future	161
11.5. Conclusions and future	166
—	
Chronology of ILL events	169
Key people involved in the history of the ILL	171
Appendixes. Some historical documents	179
A1 - Franco-German intergovernmental agreement	179
A2 - Activity report by Maier-Leibnitz 1968	182
A3 - Visit of SRC 6-7 March 1970 - Conclusions (Jolliffe)	186
A4 - Letter from Flowers to Creyssel in January 1972	187
A5 - Fender: recommendation to build the synchrotron on the ILL site	189
A6 - Intervention of Dr. Newport at the Steering Committee of 28 November 1991	190
A7 - Ipoustéguy's interpretation of the work he made for the ILL	191
Acknowledgements. Past and present	193
Postscript. Translator's note	195
