

Contents

Chapter 0	Urban metabolism for the urban century	1
0.1	Motivation	3
0.2	The research questions	5
0.3	Aim of the book	8

Part A: Vision and Theory

Chapter 1	City: A socio-ecological view of human communities	11
1.1	Introduction	13
1.2	Urban sustainable development debate	14
1.3	Urban metabolism and principle of entropy increase	15
Chapter 2	Traditional Ecological Knowledge (TEK) of urban sustainability	19
2.1	Introduction	21
2.2	Method	22
2.3	Urban TEK and environmental sustainability	25
2.4	Urban TEK and economic sustainability	29
2.5	Urban TEK and social sustainability	30
2.6	Discussion	33
2.7	Conclusion	38
Chapter 3	Urban metabolism theory and analysis methods	41
3.1	Introduction	43
3.2	Origin and development of metabolic theory	43
3.3	Metabolic studies at different scales	49
3.4	Main methods of metabolism research	53
3.5	Implication of metabolism study on different scale	60
Chapter 4	Environmental accounting and urban metabolism	65
4.1	Introduction	67
4.2	Present knowledge for urban environmental accounting and management	69
4.3	Present challenges for urban environmental accounting and management	73
4.4	Discussion	74

Chapter 5 Ecosystem services accounting framework and urban metabolism	77
5.1 Introduction	79
5.2 Literature review	81
5.3 The framework for non-monetary ESV accounting	84
5.4 Discussion	93
5.5 Conclusion.....	99
Chapter 6 A physical view of urban metabolism dynamics	101
6.1 Introduction	103
6.2 Allometric laws and cities	103
6.3 Global energy constrains	111
6.4 Conclusions	125
Chapter 7 Urban metabolism and urban ecological culture	127
7.1 Introduction	129
7.2 Analogy between cell and ecological culture	129
7.3 Cellular structure and function	130
7.4 Concept model of reconstruction of UEC	131
7.5 Conclusion.....	136
Chapter 8 Circular economy and urban ecological management	137
8.1 Introduction	139
8.2 The evolution of circular economy practices in China and Europe	147
8.3 Concluding remarks	159

Part B: Tools and Approaches

Chapter 9 Urban metabolic process analysis	165
9.1 Introduction	167
9.2 Methodology	168
9.3 Ecological economic account of Beijing urban ecosystem	173
9.4 Discussion	187
9.5 Conclusion.....	191
Chapter 10 Urban metabolic flux and structure analysis	193
10.1 Introduction	195
10.2 Methodology and data use.....	197
10.3 Results	199
10.4 Conclusion and discussion	212
Chapter 11 Urban metabolic network structure analysis	215
11.1 Introduction	217
11.2 Methodology	218

11.3	Extended exergy analysis	226
11.4	Ecological network analysis results	233
11.5	Discussion	237
11.6	Conclusion	239
Chapter 12	Environmental impact analysis in urban metabolic system	241
12.1	Introduction	243
12.2	Characteristics of the environment and economy in Beijing	245
12.3	Methodology	245
12.4	Results and discussion	254
12.5	Conclusion	263
Chapter 13	Urban metabolic dynamic analysis	265
13.1	Introduction	267
13.2	State of the art	268
13.3	Material and methods	269
13.4	Model calibration and parameter selection	276
13.5	Results	280
13.6	Discussion and conclusion	285
Chapter 14	Urban metabolism health evaluation and spatial development pattern analysis	289
14.1	Introduction	291
14.2	Materials and methods	292
14.3	Results	298
14.4	Discussion	302
14.5	Conclusion	304
Chapter 15	Urban agglomeration metabolism sustainability analysis	307
15.1	Introduction	309
15.2	Methods	313
15.3	Results	324
15.4	Discussion	333
15.5	Conclusion	336
Chapter 16	Thermodynamic geography of urban metabolic process	339
16.1	Introduction	341
16.2	Material and methods	345
16.3	Results and discussion	356
16.4	Conclusion	366
Chapter 17	Urban food-energy-water nexus analysis to support urban circular economy strategy	369
17.1	Introduction	371
17.2	Literature review	373

17.3	Method	376
17.4	Results	386
17.5	Discussion	391
17.6	Conclusion	402

Part C: Case studies

Chapter 18	Urban municipal solid waste metabolism and management	407
18.1	Introduction	409
18.2	Methodology	411
18.3	Results	417
18.4	Discussion	424
18.5	Conclusion	427
Chapter 19	Hospital solid waste metabolism and management	429
19.1	Introduction	431
19.2	Field test and data collection	441
19.3	Results	460
19.4	Discussion	464
19.5	Conclusion and recommendations	468
Chapter 20	Metabolism efficiency analysis of urban transportation system	471
20.1	Introduction	473
20.2	Literature review	474
20.3	Methods	476
20.4	Case study	479
20.5	Results	483
20.6	Discussion	495
20.7	Conclusion	496
Chapter 21	Metabolic efficiency analysis of Waste Electrical and Electronic Equipment (WEEE)	499
21.1	Introduction	501
21.2	Methodology and analysis	519
21.3	Results and discussion	537
21.4	Conclusion	558
Chapter 22	Urban wastewater metabolism and sewage sludge management	563
22.1	Introduction	565
22.2	Current situation in Italy and China	575
22.3	Method: life cycle assessment	585
22.4	Nocera superior and Gaobeidian WWTPs	591

22.5	Results and discussion	603
22.6	Conclusion	642
Chapter 23	Sewage sludge reduction and reuse in clinker production process	645
23.1	Introduction	647
23.2	Literature review	648
23.3	Materials and methods	651
23.4	Results	657
23.5	Conclusion	666
Chapter 24	Urban water metabolic systems analysis	667
24.1	Introduction	669
24.2	Methods	672
24.3	Results	676
24.4	Discussion and conclusion	685

Part D: Urban Culture and Arts as A Parallel of Metabolism Thinking

Chapter 25	Mapping the world through system modelling and creative languages	691
25.1	Introduction	693
25.2	The diagram language in system modelling	694
25.3	The language of music	699
25.4	Conclusion	701
Chapter 26	Culture, innovation and aesthetics	703
26.1	Introduction	705
26.2	Culture and the human information cycle	705
26.3	Information and innovation	709
26.4	Aesthetics	710
26.5	Conclusion	711
Chapter 27	Artistic approach to urban narratives	713
27.1	Introduction	715
27.2	Artistic languages and the environment: examples from real artworks	715
References		735
Appendix		803
	Network analysis data in seven sectors	803
Afterword		811
