|  |    |
|--|----|
| Foreword . . . . .   | IX |
| Introduction. . . . .  | XI |
| <hr/>  |    |
| CHAPTER 1  |    |
| <hr/>  |    |
| Adequate and Inadequate Stimuli . . . . .  | 1  |
| <hr/>  |    |
| CHAPTER 2  |    |
| <hr/>  |    |
| The Threshold . . . . .  | 3  |
| 2.1 Absolute and Difference Threshold . . . . .                                    | 4  |
| 2.2 Weber's, Fechner's and Stevens' Laws . . . . .                                 | 5  |
| <hr/>  |    |
| CHAPTER 3  |    |
| <hr/>  |    |
| The Psychometric Function . . . . .  | 9  |
| <hr/>  |    |
| CHAPTER 4  |    |
| <hr/>  |    |
| Detection and Discrimination Threshold . . . . .                                   | 17 |
| <hr/>  |    |
| CHAPTER 5  |    |
| <hr/>  |    |
| Response Models . . . . .  | 21 |
| 5.1 Yes/no Response Model [Y/N] . . . . .  | 21 |
| 5.2 Alternative Forced Choice Model [AFC] . . . . .                                | 21 |
| 5.2.1 The "Implicit" AFC Version . . . . .   | 24 |
| 5.3 Target Probability in Y/N and AFC Response Models . . . . .                    | 27 |
| 5.4 Alternative Unforced Choice Response Model (AUC: Kaernbach,<br>2001) . . . . . | 28 |
| 5.5 Modified AUC (Klein, 2001) . . . . .   | 29 |
| <hr/>  |    |
| CHAPTER 6  |    |
| <hr/>  |    |
| False-Negative and False-Positive Errors (Lapse and Guess Rate) . . . . .          | 31 |

## CHAPTER 7

---

|   |    |
|---|----|
| Psychophysical Procedures . . . . .   | 35 |
| 7.1 Nonadaptive Psychophysical Procedures: The Method of Constant Stimuli . . . . .             | 35 |
| 7.2 Nonadaptive Psychophysical Procedures: The Method of Limits and of the Adjustment . . . . . | 38 |

## CHAPTER 8

---

|  |    |
|--|----|
| Adaptive Psychophysical Procedures . . . . . | 41 |
|--|----|

## CHAPTER 9

---

|   |    |
|---|----|
| Nonparametric Adaptive Psychophysical Procedures . . . . .  | 45 |
| 9.1 Truncated Staircase Method (Simple Up-down Method: Dixon and Mood, 1948; von Békésy, 1960; Cornsweet, 1962) . . . . .         | 45 |
| 9.1.1 Two Interleaved Staircases to Preserve the Assumption of Independence . . . . .   | 48 |
| 9.2 Transformed Up-down Staircase Method (Up-down Transformed Response, UDTR: Wetherill and Levitt, 1965; Levitt, 1970) . . . . . | 48 |
| 9.2.1 (UDTR) Staircase with Rating of Confidence . . . . .  | 49 |
| 9.3 Forced-Choice Tracking (Zwislocki <i>et al.</i> , 1958) . . . . .   | 50 |
| 9.4 Non-parametric Up-down Staircase Method (Derman, 1957) . . . . .  | 50 |
| 9.5 Weighted Up-down Method (Kaernbach, 1991) . . . . .   | 51 |
| 9.6 Stochastic Approximation (Robbins and Monroe, 1951) . . . . .   | 53 |
| 9.7 Accelerated Stochastic Approximation (Kesten, 1958) . . . . .   | 55 |
| 9.8 Block Up-down Temporal Interval Forced Choice (BUDTIF: Campbell and Lasky, 1968) . . . . .                                    | 57 |
| 9.9 Parameter Estimation by Sequential Testing (PEST: Taylor and Creelman, 1967) . . . . .  | 57 |
| 9.10 A More Virulent PEST (Findlay, 1978) . . . . .   | 61 |
| 9.11 Binary Search and Modified Binary Search (MOBS: Tyrrell and Owens, 1988) . . . . .   | 62 |

## CHAPTER 10

---

|   |    |
|---|----|
| Parametric Adaptive Psychophysical Procedures . . . . .   | 69 |
| 10.1 The Maximum Likelihood Estimation [MLE] . . . . .  | 70 |
| 10.1.1 Psychophysical Procedures Based on MLE: The Best PEST (Pentland, 1980; Lieberman and Pentland, 1982) . . . . . | 75 |
| 10.1.2 The MLE Simplified Approximation of Emerson (Emerson, 1984) . . . . .  | 75 |
| 10.2 Bayesian Psychophysical Procedures . . . . .   | 76 |
| 10.2.1 Quick Estimation by Sequential Testing (QUEST: Watson and Pelli, 1979, 1983) . . . . .                         | 79 |
| 10.2.2 ZEST (Zippy Estimation of Sequential Testing: King-Smith <i>et al.</i> , 1994) . . . . .                       | 80 |

|        |  |    |
|--------|--|----|
| 10.2.3 | The Minimum Variance Method (King-Smith, 1984; King-Smith <i>et al.</i> , 1994) . . . . .                          | 81 |
| 10.2.4 | The Ideal Procedure: Behemoth Estimation of Sequential Testing (BEST: Pelli, 1987; Sims and Pelli, 1987) . . . . . | 82 |
| 10.2.5 | YAAP (“Yet Another Adaptive Procedure: Treutwein, 1997”) . . . . .   | 83 |
| 10.2.6 | The Step Method (Simpson, 1989) . . . . .  | 84 |
| 10.2.7 | MUEST (Snoeren and Puts, 1997) . . . . .   | 86 |

---

## CHAPTER 11

|      |   |     |
|------|---|-----|
|      | Adaptive Psychophysical Procedures for the Estimate of the Slope . . . . .                          | 87  |
| 11.1 | Adaptive Probit Estimation (APE: Watt and Andrews, 1981) . . . . .                                  | 92  |
| 11.2 | Hall’s Hybrid Procedure (Hall, 1981) . . . . .  | 94  |
| 11.3 | The Simulated Staircase Technique of Leek, Hanna and Marshall (Leek <i>et al.</i> , 1992) . . . . . | 94  |
| 11.4 | The Adaptive Threshold and Slope Estimation (ATASE: Kaernbach, 2001b) . . . . .                     | 95  |
| 11.5 | Modified ZEST (King-Smith and Rose, 1997) . . . . .   | 99  |
| 11.6 | The $\Psi$ Method (Kontsevich and Tyler, 1999) . . . . .  | 104 |
| 11.7 | The Sweet Point-Based MLE Procedure of Shen and Richards (2012) . . . . .                           | 107 |

---

## CHAPTER 12

|      |   |     |
|------|---|-----|
|      | Multidimensional Adaptive Testing . . . . .   | 113 |
| 12.1 | The Functional Adaptive Sequential Testing (FAST: Vul <i>et al.</i> , 2010) . . . . . | 114 |
| 12.2 | The Quick CSF Method (qCSF: Lesmes <i>et al.</i> , 2010) . . . . .                    | 118 |
| 12.3 | The Quick TvC Method (Lesmes <i>et al.</i> , 2006) . . . . .                          | 120 |
| 12.4 | The MEEE Method of Cobo-Lewis for Performance Categorization . . . . .                | 123 |

---

## CHAPTER 13

|        |  |     |
|--------|--|-----|
|        | What Makes a Psychophysical Technique a Good Psychophysical Technique? . . . . . | 127 |
| 13.1   | Assessing the Stability of the Psychometric Function . . . . .                   | 130 |
| 13.1.1 | The Method of Hall (1983) . . . . .  | 131 |
| 13.1.2 | The Interleaved Tracking Procedure of Leek <i>et al.</i> (1991) . . . . .        | 133 |
| 13.2   | Assessing the Goodness-of-fit . . . . .  | 134 |

---

## CHAPTER 14

|        |  |     |
|--------|--|-----|
|        | What is the Best Psychophysical Technique? . . . . .                       | 137 |
| 14.1   | AFC or Y/N: Which is the Best Response Model? . . . . .                    | 137 |
| 14.1.1 | Subjective Criterion in the Y/N and Bias in n-AFC Response Model . . . . . | 137 |
| 14.1.2 | Drawbacks of the $n$ -AFC Response Models . . . . .                        | 139 |

|        |   |     |
|--------|---|-----|
| 14.1.3 | Drawbacks of the Y/N Response Model . . . . .   | 141 |
| 14.1.4 | Spatial or Temporal AFC? How Many Forced Choices? . . . .                                       | 142 |
| 14.2   | What is the Best Psychophysical Procedure? . . . . .  | 144 |
| 14.2.1 | Nonadaptive <i>vs.</i> Adaptive Procedures . . . . .  | 144 |
| 14.2.2 | Adaptive Nonparametric Procedures: Variable <i>vs.</i> Fixed<br>Step Size . . . . .             | 145 |
| 14.2.3 | Adaptive Nonparametric <i>vs.</i> Parametric Procedures . . . . .                               | 146 |
| 14.2.4 | Adaptive Parametric Procedures . . . . .  | 147 |
| 14.2.5 | Considerations on the Staircase Procedures with Fixed Step<br>Size: the Optimal Setup . . . . . | 148 |
| 14.3   | Drawbacks of the Maximum Likelihood Estimation . . . . .  | 150 |
| 14.4   | Drawback of the Bayesian Procedures . . . . .   | 153 |

## CHAPTER 15

---

|      |  |     |
|------|--|-----|
|      | Introduction to the Signal Detection Theory . . . . .                                | 155 |
| 15.1 | SDT and the ROC Curve in Y/N and 2AFC Response Models . . . . .                      | 161 |
| 15.2 | The Single-Interval Adjustment Matrix Procedure<br>(SIAM: Kaernbach, 1990) . . . . . | 164 |

## CHAPTER 16

---

|      |   |     |
|------|---|-----|
|      | Suprathreshold Psychophysics . . . . .                            | 169 |
| 16.1 | Procedures Based on Magnitude Scaling: Category Scaling . . . . . | 169 |
| 16.2 | Procedures Based on Magnitude Estimation . . . . .                | 170 |
| 16.3 | Procedures Based on Reaction Time . . . . .                       | 171 |

## CHAPTER 17

---

|  |   |     |
|--|---|-----|
|  | Brief Outline of Comparative Psychophysics . . . . .                | 173 |
|  | Afterword. The Inverse Problem of Perception . . . . .              | 175 |
|  | Appendix I- Logistic and Weibull Distribution. . . . .              | 179 |
|  | Appendix II- The Maximum Likelihood Estimation. . . . .             | 181 |
|  | Appendix III- Probit Analysis. . . . .                              | 185 |
|  | Appendix IV- About Bayes' Theorem and Bayesian Statistics . . . . . | 189 |
|  | References . . . . .  | 195 |
|  | Index . . . . .   | 201 |
