

Contents

Preface	xi
Introduction	1
Chapter 1 • Entering the Realm of Amateur Astronomical Spectroscopy	7
1.1 Spectrography, Spectrometry, Spectroscopy...	7
1.2 What Does a Spectrum Look Like ?	7
1.3 The Missing Link	9
1.4 Short History	12
1.5 Amateur Spectroscopy Today	15
1.6 Starting Spectroscopy	19
Chapter 2 • Light	25
2.1 Light is a Wave	25
2.2 Light is a Particle	29
2.3 Making Light	30
2.4 Shifting a Spectrum	35
2.5 What a Human Eye Sees	38
2.6 Atoms and Molecules	40
Chapter 3 • What Light Tells us about Stars	41
3.1 The Light of an Ordinary Star	41
3.2 Each star has its Own Spectrum	43
3.3 Observing at Different Resolutions	45
3.4 Limiting Magnitude	49
3.5 A Moving Sky	50
3.6 Time Evolution	55
3.7 Not only Stars	56
3.8 Basic Chemistry	56

Chapter 4 • What can I Observe with my Instrument ?	59
4.1 The Basic Questions	59
4.2 Many Types of Observations	62
4.3 What Physical Phenomena to Observe ?	64
4.4 Start with Low Resolution	65
4.5 Start with Different Spectral Types	65
4.6 Organize your Observation	65
Chapter 5 • Optical Principles of a Spectroscope	67
5.1 Reflection, Refraction and Diffraction	67
5.2 Prism and Grating	69
5.3 Refresh of Geometric Optics	81
5.4 Refracting and Reflecting Telescopes	84
5.5 Architecture of a Spectroscope	86
5.6 A Real Example: Alpy 600	90
5.7 Another Example: Lhires III	91
5.8 Guiding Stage	95
5.9 Calibration Light	97
5.10 Échelle Spectroscopes	99
5.11 Fibre Optic	100
Chapter 6 • Main Parameters of a Spectroscope	103
6.1 Resolution and Resolving Power	103
6.2 Focal ratio (F-ratio)	105
6.3 Magnification and Sampling	108
6.4 Resolution and Dispersion	112
6.5 Spectral Range	112
6.6 Spectral Domain	113
6.7 Efficiency	113
6.8 Mechanical Backfocus and Fastening	115
6.9 Telescope and Sky Quality	118
6.10 Adjusting the Configuration	120
6.11 Keep it Simple !	124
Chapter 7 • CCD Cameras and Acquisition Softwares	125
7.1 A Wide Variety of Choices	125
7.2 Image Detector or Light Detector ?	128
7.3 Acquisition Software	132
7.4 Some Simple Manipulations	135
Chapter 8 • Adjusting the Spectroscope on a Table	143
8.1 Which Light Source ?	143
8.2 Install the Acquisition Camera	146
8.3 Focusing and Orientation	147
8.4 Blue on Left, the Red on the Right	150

8.5	Choice of the Range of Wavelength	151
8.6	Setting up the Guiding Camera	152
Chapter 9 • Physical Measurements and Data Reduction		153
9.1	Your mission: the Spectral Profile	153
9.2	Do not put the Cart before the Horse	154
9.3	Intensity and Wavelength	155
9.4	Distinguishing Technicalities and Science	155
9.5	Systematic and Random Errors	156
9.6	Signal-to-Noise Ratio	157
9.7	The Steps to Reduce the Data	158
9.8	Catalogues of Reference Stars	167
9.9	An observation is a Set of Images	168
Chapter 10 • First Spectroscopic Observation: The Sun		171
10.1	Reference Images	172
10.2	Data Reduction	172
10.3	Wavelength Calibration	178
10.4	Correction for the Instrumental Response	180
Chapter 11 • Mastering the Telescope		187
11.1	Mastering the Mount	187
11.2	Calculation of the Image Field	194
11.3	Understand the Telescope Motion	195
11.4	Pointing at a Star	197
11.5	Autoguiding	201
Chapter 12 • Installing the Spectroscope on the Telescope		205
12.1	Stiff Mechanical Match	205
12.2	Orientation of the Spectroscope	206
12.3	Balancing and Cables Management	206
12.4	Plugging in	208
12.5	Focus Guiding and Telescope	208
12.6	Last Checks	211
12.7	At the Beginning of the Night...	211
Chapter 13 • Spectroscopic Observation of another Star		219
13.1	Starting the Observation	219
13.2	The Reference Star	220
13.3	Point to the Target Star	220
13.4	Take all the Reference Images	220
13.5	Data Reduction	221
13.6	Going Beyond	223

Chapter 14 • Quality of the Spectrum	227
14.1 Read the Outcome of the Calculation	228
14.2 Compare with other Observers	228
14.3 Verify the Wavelength Calibration	229
14.4 Non-uniform Intensities in the Observations	230
14.5 Measure of the SNR	231
14.6 Level of the Signal for your Instrument	231
Chapter 15 • Ready for the Adventure	233
15.1 The Typical Observing Session	233
15.2 Improve your Observations	235
15.3 Improve the Quality of the Data	235
15.4 Improve your Productivity	239
15.5 Share your Results	240
15.6 Spectra of Professional Quality	241
Conclusion	243
Glossary	245
References	247

Note : words wave underlined this way are defined in the glossary.
