<b>Chapter 1</b>	<b>Linear Systems and Matrices</b>	<b>1</b>
1.1	Introduction to Linear Systems and Matrices	1
1.1.1	Linear equations and linear systems	1
1.1.2	Matrices	3
1.1.3	Elementary row operations	4
1.2	Gauss-Jordan Elimination	5
1.2.1	Reduced row-echelon form	5
1.2.2	Gauss-Jordan elimination	6
1.2.3	Homogeneous linear systems	9
1.3	Matrix Operations	11
1.3.1	Operations on matrices	11
1.3.2	Partition of matrices	13
1.3.3	Matrix product by columns and by rows	13
1.3.4	Matrix product of partitioned matrices	14
1.3.5	Matrix form of a linear system	15
1.3.6	Transpose and trace of a matrix	16
1.4	Rules of Matrix Operations and Inverses	18
1.4.1	Basic properties of matrix operations	19
1.4.2	Identity matrix and zero matrix	20
1.4.3	Inverse of a matrix	21
1.4.4	Powers of a matrix	23
1.5	Elementary Matrices and a Method for Finding $A^{-1}$	24
1.5.1	Elementary matrices and their properties	24
1.5.2	Main theorem of invertibility	26
1.5.3	A method for finding $A^{-1}$	27
1.6	Further Results on Systems and Invertibility	28
1.6.1	A basic theorem	28
1.6.2	Properties of invertible matrices	29
1.7	Some Special Matrices	31

1.7.1	Diagonal and triangular matrices	32
1.7.2	Symmetric matrix	34
	Exercises	35
<b>Chapter 2</b>	<b>Determinants</b>	42
2.1	Determinant Function	42
2.1.1	Permutation, inversion, and elementary product	42
2.1.2	Definition of determinant function	44
2.2	Evaluation of Determinants	44
2.2.1	Elementary theorems	44
2.2.2	A method for evaluating determinants	46
2.3	Properties of Determinants	46
2.3.1	Basic properties	47
2.3.2	Determinant of a matrix product	48
2.3.3	Summary	50
2.4	Cofactor Expansions and Cramer's Rule	51
2.4.1	Cofactors	51
2.4.2	Cofactor expansions	51
2.4.3	Adjoint of a matrix	53
2.4.4	Cramer's rule	54
	Exercises	55
<b>Chapter 3</b>	<b>Euclidean Vector Spaces</b>	61
3.1	Euclidean $n$ -Space	61
3.1.1	$n$ -vector space	61
3.1.2	Euclidean $n$ -space	62
3.1.3	Norm, distance, angle, and orthogonality	63
3.1.4	Some remarks	65
3.2	Linear Transformations from $\mathbb{R}^n$ to $\mathbb{R}^m$	66
3.2.1	Linear transformations from $\mathbb{R}^n$ to $\mathbb{R}^m$	66
3.2.2	Some important linear transformations	67
3.2.3	Compositions of linear transformations	69
3.3	Properties of Transformations	70
3.3.1	Linearity conditions	70
3.3.2	Example	71
3.3.3	One-to-one transformations	72
3.3.4	Summary	73
	Exercises	74
<b>Chapter 4</b>	<b>General Vector Spaces</b>	79
4.1	Real Vector Spaces	79
4.1.1	Vector space axioms	79

- 4.1.2 Some properties ..... 81
- 4.2 Subspaces ..... 81
  - 4.2.1 Definition of subspace ..... 82
  - 4.2.2 Linear combinations ..... 83
- 4.3 Linear Independence ..... 85
  - 4.3.1 Linear independence and linear dependence ..... 86
  - 4.3.2 Some theorems ..... 87
- 4.4 Basis and Dimension ..... 88
  - 4.4.1 Basis for vector space ..... 88
  - 4.4.2 Coordinates ..... 89
  - 4.4.3 Dimension ..... 91
  - 4.4.4 Some fundamental theorems ..... 93
  - 4.4.5 Dimension theorem for subspaces ..... 95
- 4.5 Row Space, Column Space, and Nullspace ..... 97
  - 4.5.1 Definition of row space, column space, and nullspace ..... 97
  - 4.5.2 Relation between solutions of  $A\mathbf{x} = \mathbf{0}$  and  $A\mathbf{x} = \mathbf{b}$  ..... 98
  - 4.5.3 Bases for three spaces ..... 100
  - 4.5.4 A procedure for finding a basis for  $\text{span}(S)$  ..... 102
- 4.6 Rank and Nullity ..... 103
  - 4.6.1 Rank and nullity ..... 104
  - 4.6.2 Rank for matrix operations ..... 106
  - 4.6.3 Consistency theorems ..... 107
  - 4.6.4 Summary ..... 109
- Exercises ..... 110
- Chapter 5 Inner Product Spaces ..... 115**
  - 5.1 Inner Products ..... 115
    - 5.1.1 General inner products ..... 115
    - 5.1.2 Examples ..... 116
  - 5.2 Angle and Orthogonality ..... 119
    - 5.2.1 Angle between two vectors and orthogonality ..... 119
    - 5.2.2 Properties of length, distance, and orthogonality ..... 120
    - 5.2.3 Complement ..... 121
  - 5.3 Orthogonal Bases and Gram-Schmidt Process ..... 122
    - 5.3.1 Orthogonal and orthonormal bases ..... 122
    - 5.3.2 Projection theorem ..... 125
    - 5.3.3 Gram-Schmidt process ..... 128
    - 5.3.4  $QR$ -decomposition ..... 130
  - 5.4 Best Approximation and Least Squares ..... 133
    - 5.4.1 Orthogonal projections viewed as approximations ..... 134

5.4.2	Least squares solutions of linear systems	135
5.4.3	Uniqueness of least squares solutions	136
5.5	Orthogonal Matrices and Change of Basis	138
5.5.1	Orthogonal matrices	138
5.5.2	Change of basis	140
	Exercises	144
<b>Chapter 6</b>	<b>Eigenvalues and Eigenvectors</b>	149
6.1	Eigenvalues and Eigenvectors	149
6.1.1	Introduction to eigenvalues and eigenvectors	149
6.1.2	Two theorems concerned with eigenvalues	150
6.1.3	Bases for eigenspaces	151
6.2	Diagonalization	152
6.2.1	Diagonalization problem	152
6.2.2	Procedure for diagonalization	153
6.2.3	Two theorems concerned with diagonalization	155
6.3	Orthogonal Diagonalization	156
6.4	Jordan Decomposition Theorem	160
	Exercises	162
<b>Chapter 7</b>	<b>Linear Transformations</b>	166
7.1	General Linear Transformations	166
7.1.1	Introduction to linear transformations	166
7.1.2	Compositions	169
7.2	Kernel and Range	170
7.2.1	Kernel and range	170
7.2.2	Rank and nullity	172
7.2.3	Dimension theorem for linear transformations	173
7.3	Inverse Linear Transformations	174
7.3.1	One-to-one and onto linear transformations	174
7.3.2	Inverse linear transformations	176
7.4	Matrices of General Linear Transformations	177
7.4.1	Matrices of linear transformations	177
7.4.2	Matrices of compositions and inverse transformations	181
7.5	Similarity	182
	Exercises	184
<b>Chapter 8</b>	<b>Additional Topics</b>	190
8.1	Quadratic Forms	190
8.1.1	Introduction to quadratic forms	190
8.1.2	Constrained extremum problem	191
8.1.3	Positive definite matrix	193

8.2 Three Theorems for Symmetric Matrices ..... 194

8.3 Complex Inner Product Spaces ..... 198

    8.3.1 Complex numbers ..... 198

    8.3.2 Complex inner product spaces ..... 200

8.4 Hermitian Matrices and Unitary Matrices ..... 201

8.5 Böttcher-Wenzel Conjecture ..... 204

    8.5.1 Introduction ..... 205

    8.5.2 Proof of the Böttcher-Wenzel conjecture ..... 205

    Exercises ..... 209

**Appendix A Independence of Axioms** ..... 214

**Bibliography** ..... 217

**Index** ..... 219
