Preface

Chapter 1	Complex Number Field	1
1.1	Addition and Multiplication	1
1.2	Basic Algebraic Properties	3
1.3	Further Properties	6
1.4	Moduli of Complex Numbers	8
1.5	Conjugates of Complex Numbers	12
1.6	Arguments of Complex Numbers	15
1.7	Arguments of Products and Quotients	18
1.8	Roots of Complex Numbers	22
1.9	Examples of Roots	24
1.10	Domains and Regions in the Complex Plane	28
Chapter 2	Complex Variable Functions	33
2.1	Complex Variable Functions	33
2.2	Functions as Mappings	36
2.3	The Exponential Function and its Mapping Properties	40
2.4	Limits of Sequences and Functions	42
2.5	Properties of Limits	45
2.6	Limits Involving the Infinity	47
2.7	Continuous Functions	50
2.8	Differentiable Functions	52
2.9	Differentiation Formulas	54
2.10	A Characterization of Differentiability	57
2.11	Cauchy-Riemann Equations in Polar Coordinates	62
2.12	Analytic Functions	65
Chapter 3	Elementary Functions	69
3.1	The Exponential Function	69

3.2 Trigonometric Functions 71

3.3 The Logarithmic Function 73

3.4 Branches of Logarithms 76

3.5 Complex Power Functions 79

Chapter 4 Integral Theory of Complex Functions 82

4.1 Definite Integrals 82

4.2 Path Integrals 87

4.3 Computation and Estimation of Integrals 91

4.4 Cauchy Integral Theorem and its Extensions 97

4.5 Proof of Cauchy Integral Theorem 105

4.6 Cauchy Integral Formula 110

4.7 Cauchy Integral Formula for Derivatives 113

4.8 Liouville’s Theorem and Maximum Modulus Principle 120

Chapter 5 Taylor Series and Laurent Series 126

5.1 Convergence of Series 126

5.2 Taylor Series 129

5.3 Laurent Series 136

5.4 Absolute and Uniform Convergence of Power Series 144

5.5 Properties of Sums of Power Series 148

5.6 Uniqueness of Series Representations 154

Chapter 6 Singular Points and Zeros of Analytic Functions 159

6.1 Singular Points 159

6.2 Behavior of a Function Near Isolated Singular Points 164

6.3 Residues of Functions 169

6.4 Zeros of Analytic Functions 178

6.5 Zeros and Poles 182

6.6 Argument Principle 186

6.7 Rouché’s Theorem 191

Chapter 7 Conformal Mappings 196

7.1 Concepts and Examples 196

7.2 Unilateral Functions 201

7.3	Local Inverses	204
7.4	Affine Transformations	208
7.5	The Reciprocal Transformation	210
7.6	Fractional Linear Transformations	215
7.7	Cross Ratios	217
7.8	Mappings of the Upper Half Plane	222
Bibliography		229
