Prefaces	9
Foreword	11
<i>T. Gaillard and J.-L. Mari</i>	
The authors	13
Introduction	15
<i>T. Gaillard and J.-L. Mari</i>	
Chapter 1 • The Poitou Threshold	19
<i>T. Gaillard and P. Branger</i>	
Location and definition	19
Tectonic structure of the Poitou Threshold: a brief history of knowledge	21
Sedimentary coverage	28
Poitou threshold definition	31
References	32
Chapter 2 • The stratigraphy of the Middle Jurassic	37
<i>P. Branger, T. Gaillard and H. Geairon</i>	
Paleontological division of the Middle Jurassic	37
Deposit sequences	38
Stratigraphy of the Middle Jurassic on the Poitou Threshold	40
Aalenian	40

D6	41
D7 – Lower Bajocian	41
D8 – Upper Bajocian	42
D9 – Lower Bathonian	43
D10 – Middle and upper Bathonian	43
Stratigraphy of the Bajocian south of Poitiers: the cliffs of Passelourdin	44
Conclusion	51
References	51
Chapter 3 • Hydrogeology of the Poitou Threshold	59
<i>T. Gaillard and M. Moreau</i>	
Aquifers of the Poitou threshold	59
Two main aquifers	59
Piezometric map	60
The supra-Toarcian aquifer	64
Groundwater flow patterns in the supra-Toarcian aquifer	64
Comparison between lineaments and speleological networks	65
Typology of voids in Poitou threshold limestones	68
Pumping tests	71
Conclusion	77
Acknowledgements	78
References	78
Chapter 4 • The Hydrogeological Experimental Site of Poitiers University (France)	81
<i>T. Gaillard</i>	
Origin of the hydrogeological experimental site (HES)	81
HES description	82
Scientific studies	84
References	85
Chapter 5 • Geophysical methods	87
<i>J.-L. Mari</i>	
5.1 Seismic and acoustic methods	89
5.2 3D seismic imaging	92
5.3 Full waveform acoustic logging	98
5.4 Vertical seismic profiles versus full waveform acoustic logging	103
5.5 Electrical methods	107

5.6	Conclusions	111
	Appendix: Static corrections	
	Acknowledgements	116
	References	116
Chapter 6	• Borehole electrical panels: an experiment	119
	<i>M. Moreau, P. Brunel and J.-L. Mari</i>	
	Material and method	120
	Acquisition	123
	Geological Interpretation	125
	Summary	129
	Conclusions	130
	References	131
Chapter 7	• Hydrogeological flow logging and dye tracer tests on the Hydrogeological Experimental Site of Poitiers University (France)	133
	<i>A. Boulais, T. Gaillard and H. Geaïron</i>	
	Introduction	133
	Borehole flow logging acquisition	135
	Principle of flow logging	135
	Downflow and upflow in the borehole	136
	Dynamic flow logging	136
	Flow logging with pumping in MP6 (crossed dynamics MP6)	141
	Tracer tests	144
	Tracer test protocol	144
	Results	144
	Conclusion and interpretation of pathways in karst horizons	148
	References	149
Chapter 8	• Hydro-stratigraphic study of the Hydrogeological Experimental Site of Poitiers, France	151
	<i>T. Gaillard</i>	
	Objectif and method	151
	Aquifer stratigraphy of the HES	152
	Stratigraphic context	152
	Data available	153
	Lithostratigraphy of the HES	154

Occurrence of karst	161
Fracture inventory	161
Stratigraphy versus seismic and acoustic data	162
Stratigraphy versus borehole electrical methods	164
Stratigraphy and hydrogeological data	167
Conclusion	168
References	169
Chapter 9 • The Deffend hydrogeological model	173
<i>T. Gaillard</i>	
Hydrogeological knowledge before Hydrogeological Experimental Site (HES) of Poitiers	173
Historical groundwater flow model of the Poitou Threshold	173
The Poitiers HES groundwater model	175
Karst dating	176
Syngenetic karstification hypothesis	178
Conclusion	182
References	182
Conclusion	187
<i>J.-L. Mari and T. Gaillard</i>	
Acknowledgements	191
<i>J.-L. Mari and T. Gaillard</i>
