Preface

Chapter 1 History of Aeronautic	1
1.1 Evolution from Wheel to Space	1
1.2 Legends and Chinese Kites	4
1.3 Early History	5
1.3.1 Scientific Research	5
1.3.2 Birth of Lighter-than-Air	6
1.3.3 Dawn of the Dirigible (Airship)	7
1.4 Mid-Term History and Development	8
1.4.1 Heavier-than-Air Aircraft	8
1.4.2 Impact of Aircraft's Creation	13
1.4.3 World War I	14
1.5 Era of Aviation at its Peak	16
1.5.1 Commercial Flight	17
1.5.2 Bomber and Fighter during World War II	18
1.6 Jet Airplane and Evolution	21
1.6.1 The Beginning	21
1.6.2 The Next Frontier (Sound Barrier)	22
1.6.3 Early Supersonic Jet Fighter, Jet Bomber and Jet Commercial Airliner	23
1.6.4 Recent Technologies (Next Generation Jet Fighters and Airliners)	25
Chapter 2 Basic Aerodynamics	30
2.1 The Atmosphere	30
2.1.1 Atmospheric Pressure	31
2.1.2 Atmospheric Density	31
2.1.3 Atmospheric Viscosity	31
2.1.4 Sound Speed in Air	31
2.1.5 Mach Number	32
2.1.6 Flight Regimes	32
2.2 Atmospheric Regions	32
2.2.1 Troposphere	33
2.2.2 Stratosphere	33
2.2.3 Mesosphere	34
2.2.4 Thermosphere	34
2.3 Continuity Equation	34
2.4 Bernoulli's Principle	35

2.5	About Viscous Flow	36
2.5.1	Boundary Layer	36
2.5.2	Reynolds Number	39
2.6	About Compressibility	40
2.6.1	Incompressible Flow	41
2.6.2	Compressible Flow	42
2.7	Wind Tunnels	44
2.7.1	Low-Speed Wind Tunnels	44
2.7.2	Supersonic Wind Tunnels	44
Chapter 3	Airfoil, Wing, and Airplane	46
3.1	Introduction	46
3.2	Airfoil Aerodynamics	47
3.2.1	Airfoil Shape	47
3.2.2	Airfoil Lift	48
3.2.3	Airfoil Characteristics	53
3.3	Wing Lift	58
3.3.1	Finite Wings	58
3.3.2	Wing Lift Coefficient	60
3.3.3	Wingtip Vortices	62
3.3.4	Downwash	63
3.3.5	Spanwise Lift Distribution	64
3.4	High Lift Devices	65
3.4.1	Trailing-Edge Flaps	65
3.4.2	Leading-Edge Flaps and Slats	67
3.4.3	Boundary Layer Control	68
3.4.4	Powered Lift and Vectored Thrust	68
3.5	Wing and Airplane Drag	69
3.5.1	Skin Friction Drag	69
3.5.2	Pressure Drag	70
3.5.3	Induced Drag	71
3.5.4	Finite Wing Total Drag	71
3.5.5	Whole Airplane Drag	72
3.6	Mach Number Effects	73
3.6.1	Mach Wave	73
3.6.2	Critical Mach Number	74
Chapter 4	Elements of Airplane Performance	77
4.1	Introduction	77
4.2	Equations of Motion	77
4.3	Drag Curves	80
4.4	Power Curves	83
4.5	Range and Endurance	84

4.6	Gliding Flight	84
4.6.1	Maximum Glide Range	85
4.6.2	Minimum Sink Rate	86
4.7	Climbs	86
4.7.1	Maximum Climb Angle	87
4.7.2	Maximum Rate of Climb	87
4.7.3	Ceilings	88
4.8	Takeoff and Landing	88
4.9	Turning Flight	89
4.9.1	Level Turns	89
4.9.2	Vertical Turns	91
4.10	V - n Diagram	92
Chapter 5	Airplanes' Stability and Control	95
5.1	Introduction	95
5.2	Coordinate System	95
5.3	Control Surfaces	97
5.4	Stability Definition	98
5.4.1	Trim	98
5.4.2	Stability	99
5.4.3	Dynamic Stability	99
5.5	Longitudinal Stability	101
5.6	Directional Stability	102
5.7	Lateral Stability	102
Chapter 6	Aircraft Propulsion	104
6.1	Introduction	104
6.2	Airplane Propellers	106
6.3	Piston Engine	108
6.4	Turbojet Engine	109
6.5	Afterburners	110
6.6	Turbofan Engine	111
6.7	Turboprop Engine	112
6.8	Turboshaft Engine	113
6.9	Ramjets	113
Chapter 7	Airplane Structure	115
7.1	Introduction	115
7.2	Mechanics Conception	116
7.2.1	Stress and Strain	116
7.2.2	Stress-Strain Relationship: Hooke's Law	118
7.2.3	Plastic Deformation	118
7.2.4	Failure	119
7.2.5	Fatigue	119

- 7.2.6 Type of Stress.....120
- 7.3 An Airplane’s Loads.....122
 - 7.3.1 Point Loads.....122
 - 7.3.2 Distributed Loads123
 - 7.3.3 Gust Loads123
 - 7.3.4 V-n Diagram124
- 7.4 Structural Layout125
- 7.5 Component Sizing.....127
 - 7.5.1 Choosing Structural Shapes.....128
 - 7.5.2 Sizing to Stress Limits128
 - 7.5.3 Sizing to Fatigue Limits.....131
 - 7.5.4 Sizing to Deflection Limits131
 - 7.5.5 Buckling.....132
 - 7.5.6 Design Considerations133
- Chapter 8 Airplane Instruments.....136**
 - 8.1 Introduction.....136
 - 8.2 Early Airplane Instruments.....136
 - 8.3 Instrument Classification137
 - 8.3.1 Classification by Principle of Operation138
 - 8.3.2 Classification by Use.....138
 - 8.4 Typical Instruments.....139
 - 8.4.1 Gyroscope139
 - 8.4.2 Flight Instruments.....140
 - 8.4.3 Engine Instruments.....143
 - 8.5 Navigation Conception144
 - 8.5.1 Radio Navigation.....145
 - 8.5.2 Inertial Navigation145
 - 8.5.3 Satellite Navigation.....145
 - 8.5.4 Celestial Navigation145
- Chapter 9 Fundamentals of Helicopter.....147**
 - 9.1 A Century of History.....147
 - 9.1.1 Myths and Early Inventions.....147
 - 9.1.2 Breakthrough and Development149
 - 9.1.3 Future Attack Reconnaissance Aircraft (FARA)154
 - 9.2 Basics of Helicopters156
 - 9.2.1 Key Parts of a Helicopter157
 - 9.2.2 Forces Acting on a Helicopter161
 - 9.2.3 Flight Controls.....163
- Chapter 10 History of Astronautic.....166**
 - 10.1 Evolution throughout History166
 - 10.2 Rocketry as a Science168

10.3	The Dawn of the Space Race	171
10.3.1	Sputnik I & II	171
10.3.2	The Birth of Explorer I & Vanguard's Rocket	172
10.3.3	The Geopolitical War	173
10.4	Landing on the Moon	174
10.5	Space Mission	175
10.5.1	The Challenger and Columbia Shuttle	176
10.5.2	Shenzhou V	177
10.5.3	International Space Station	177
10.6	Prospect for a Space Odyssey	178
10.6.1	Future Space Discovery	178
10.6.2	Back to the Moon	178
10.6.3	Future Spacecraft and Robotic Exploration	179
10.6.4	Mission to Mars	179
10.6.5	Private Spaceflight and Tourism	180
References		182
Appendix A Classification of Aircraft		183
