

Contents

Chapter 1	Overview of Spectral Techniques	1
1.1	The Origin of Spectral Techniques	1
1.1.1	Spectrum and Spectroscopy	1
1.1.2	The History of Spectral Techniques	1
1.2	The Development of Spectroscopy Instruments	3
1.2.1	The Development of Spectroscopic Theory	3
1.2.2	The Advent of the Laser	4
1.2.3	Development of Spectrometers	5
1.3	Atomic Energy Levels and Atomic Spectrum	5
1.3.1	Atomic Energy Level	5
1.3.2	Atomic Emission Spectroscopy	6
1.3.3	Atomic Absorption Spectrum	8
1.4	Molecular Spectrum	9
1.4.1	Molecular Vibrational Energy Levels and Corresponding Spectral Techniques	10
1.4.2	Molecular Electrons Moving Energy Levels and Corresponding Spectral Techniques	11
	References	12
Chapter 2	Laser-induced Breakdown Spectroscopy	15
2.1	Birth and Development of LIBS	15
2.2	Fundamentals of LIBS	17
2.2.1	Laser-induced Plasma	17
2.2.2	Local Thermodynamic Equilibrium	18
2.2.3	Plasma Temperature and Electron Number Density	19
2.2.4	Qualitative and Quantitative Analysis	20
2.3	Instrumentation for LIBS	21
2.3.1	LIBS Experimental Setup	21
2.3.2	Online/In Situ LIBS Instruments	22
2.3.3	Signal Enhancement for LIBS	23
2.4	LIBS Applications	25

2.4.1	Environmental Monitoring.....	25
2.4.2	Coal Analysis.....	27
2.4.3	Biomedicine.....	29
2.4.4	Agriculture and Food Safety	31
2.4.5	Space Exploration	32
2.4.6	Ocean Exploration.....	34
	References.....	35
Chapter 3	Raman Spectroscopy Technology	41
3.1	Birth and Development of Raman Spectroscopy.....	41
3.1.1	The Great Founder	41
3.1.2	The Birth of Raman Spectroscopy Technology.....	41
3.1.3	The Development of Raman Spectroscopy Technology.....	42
3.2	Principle of Inelastic Scattering	42
3.2.1	Nonconservation of the Kinetic Energy of Particles	42
3.2.2	Elastic and Inelastic Scattering	43
3.2.3	Raman Scattering and Rayleigh Scattering.....	43
3.2.4	Stokes and Anti-Stokes Lines.....	46
3.3	Experimental Systems for Raman Spectroscopy.....	50
3.3.1	The Source and Splitting of the Light	50
3.3.2	Collection and Monitoring	53
3.4	Surface-Enhanced Raman Spectroscopy	54
3.4.1	Defects of Ordinary Raman Spectroscopy.....	54
3.4.2	Principles of Surface-Enhanced Raman Spectroscopy	55
3.5	Important Applications of Raman Spectroscopy.....	56
3.5.1	Spectral Fingerprint	56
3.5.2	Real-time Detection of Liquid Phase Raman Spectroscopy Experiment.....	59
3.5.3	Configuration Analysis of Raman.....	62
	References.....	64
Chapter 4	Differential Optical Absorption Spectroscopy	68
4.1	Development of DOAS	68
4.1.1	Development of DOAS Abroad.....	68
4.1.2	Domestic DOAS Development	69
4.1.3	Opportunities and Challenges.....	70
4.2	Principle of DOAS	71
4.2.1	Lambert-Beer's Law.....	71

4.2.2	Advantages of DOAS	72
4.3	Experimental System of DOAS	73
4.3.1	Active DOAS System	73
4.3.2	Passive DOAS System (MAX-DOAS)	74
4.4	DOAS for Multi-platform	75
4.4.1	DOAS for the Ground Platform	75
4.4.2	DOAS for Mobile Platforms	76
4.4.3	Multi-platform Joint Application	77
4.5	Important Applications of DOAS	77
4.5.1	The Global Ozone Monitoring Experiment (GOME)	77
4.5.2	Gaofen-5 Satellite and Atmospheric Pollution Component Inversion Method	78
4.5.3	Determination of Plume from the Pollution Source	78
4.5.4	Planar Array Measurements of Volcanic Plumes	79
4.5.5	Comprehensive Stereoscopic Observation Network	80
	References	81
Chapter 5	Infrared Spectroscopy	86
5.1	Background Introduction of Infrared Spectroscopy	86
5.1.1	Infrared Radiation	86
5.1.2	IR Region	87
5.1.3	Development of IR Spectroscopy	87
5.2	Principle of IR Spectroscopy	87
5.2.1	Principle and Characteristics of IR Spectroscopy	87
5.2.2	Infrared Spectrometer	88
5.3	Fourier Transform Infrared Spectroscopy	89
5.3.1	Introduction to FTIR	89
5.3.2	Principle of FTIR Spectroscopy	89
5.4	Application of IR Spectroscopy	90
5.4.1	IR Spectroscopy and Environmental Monitoring	90
5.4.2	IR Spectroscopy and Food Detection	93
5.4.3	IR Spectroscopy and Microbiological Analyses	95
5.4.4	IR Spectroscopy and Agriculture	97
5.4.5	IR Spectroscopy and Forensic Analysis	100
	References	104
Chapter 6	Laser-induced Fluorescence Spectroscopy	107
6.1	Introduction to Fluorescence Spectroscopy	107

6.1.1	The History of Fluorescence Spectroscopy.....	107
6.1.2	Characteristics of Fluorescence Spectroscopy.....	108
6.1.3	Traditional Fluorescence Spectroscopy and Laser-induced Fluorescence Spectroscopy.....	110
6.2	The Technical Basis of Laser-induced Fluorescence	111
6.2.1	The Principle of Laser-induced Fluorescence	111
6.2.2	Affected Factors of Fluorescence.....	113
6.2.3	The Development of LIF Technology.....	114
6.3	Experimental System of LIF Spectroscopy	115
6.3.1	Excitation Light Sources.....	115
6.3.2	Detector	116
6.4	Important Applications of LIF	117
6.4.1	On-line Detection of Carbon Isotopes Based on LIF Spectroscopy of CN Radicals.....	117
6.4.2	Applications of LIF in Soils and Sediments	122
	References.....	122
Chapter 7	Ultraviolet-visible Absorption Spectroscopy	128
7.1	Introduction of UV-Vis Absorption Spectroscopy.....	128
7.2	Principles of UV-Vis Absorption Spectroscopy.....	128
7.2.1	Formation and Characteristics of UV-Vis Absorption Spectrum.....	128
7.2.2	Main Types of Electronic Transitions.....	130
7.2.3	Absorption Band	131
7.2.4	Lambert-Beer's Law and Spectrophotometric Analysis.....	132
7.3	Experimental System for UV-Vis Absorption Spectroscopy	133
7.3.1	Common Laboratory UV-Vis Absorption Spectroscopy Experimental Systems.....	133
7.3.2	Common Portable UV-Vis Absorption Spectroscopy Instruments.....	135
7.4	Important Applications of UV-Vis Absorption Spectroscopy.....	136
7.4.1	Quantitative Analysis by UV-Vis Absorption Spectroscopy.....	136
7.4.2	Qualitative Analysis by UV-Vis Absorption Spectroscopy	137
7.4.3	The Applications of UV-Vis Absorption Spectroscopy in Some Fields	139
	References.....	140
Chapter 8	Tunable Diode Laser Absorption Spectroscopy	142
8.1	Introduction of TDLAS.....	142
8.1.1	The Origin and Development of TDLAS.....	142
8.1.2	Fundamental Principle of TDLAS	143

8.2	Gas Detection Method and System	146
8.2.1	Direct Absorption Spectroscopy	146
8.2.2	Wavelength Modulation Spectroscopy	147
8.2.3	Frequency Modulated Spectroscopy	149
8.2.4	Trace Gas Telemetry System	149
8.3	Important Applications of TDLAS	151
8.3.1	Atmospheric Environment Monitoring	151
8.3.2	Combustion Flow Field Diagnosis	151
8.3.3	Breath Detection in Medicine	152
8.3.4	Application in an Industrial Process	154
	References	154
Chapter 9	Photoacoustic Spectroscopy	161
9.1	Introduction to Photoacoustic Spectroscopy	161
9.1.1	History of Photoacoustic Spectroscopy	161
9.1.2	Current Status of Research on Photoacoustic Spectroscopy	161
9.2	Principles of Photoacoustic Spectroscopy and Experimental Systems	162
9.2.1	The Photoacoustic Effect	162
9.2.2	Photoacoustic Signal and Minimum Detectable Concentration	163
9.2.3	Experimental Systems	165
9.3	Applications of PAS	168
9.3.1	Photoacoustic Spectroscopy for Aerosol Characterization	168
9.3.2	Breath Ammonia Levels in a Normal Human Population Study as Determined by Photoacoustic Laser Spectroscopy	171
9.3.3	Non-Invasive Monitoring of Blood Glucose by Photoacoustic Spectroscopy	173
	References	175
Chapter 10	Cavity Ring-Down Spectroscopy	178
10.1	The Development of Cavity Ring-Down Spectroscopy	178
10.1.1	Pulsed Cavity Ring-Down Spectroscopy and Its Development	180
10.1.2	Continuous Wave Cavity Ring-Down Spectroscopy and Its Development	181
10.1.3	Optical Fiber Cavity Ring-Down Spectroscopy and Its Development	183
10.2	The Principle and Experimental System of CRDS	184
10.2.1	The Principles of CRDS	184
10.2.2	CRDS Experimental System	187
10.3	Advanced Technology Based on CRDS	188
10.3.1	Optical Cavity-Based Advanced Techniques	188

10.3.2	Optical Cavity-Based Hybrid Techniques	192
10.4	Important Applications of CRDS	198
10.4.1	Environmental Trace Analysis.....	198
10.4.2	Biomedical Applications.....	201
10.4.3	Combustion and Plasma Diagnostics.....	202
	References.....	204
Chapter 11	X-ray Fluorescence Spectrometry.....	212
11.1	Introduction of X-ray.....	212
11.1.1	Discovery of X-ray	212
11.1.2	Generation Principle of X-ray	213
11.1.3	Interaction Effects Between X-ray and Matter.....	214
11.1.4	Representative Detecting Methods Based on X-ray.....	215
11.2	Principle of XRF and Experimental Setup.....	216
11.2.1	Characteristics and Advantages of XRF.....	216
11.2.2	WDXRF and EDXRF	217
11.2.3	Micro X-ray Fluorescence	218
11.2.4	Total Reflection X-ray Fluorescence.....	219
11.2.5	Qualitative and Quantitative X-ray Fluorescence Analysis.....	221
11.3	Significant Applications of XRF.....	222
11.3.1	XRF Applied in Environmental Detection	222
11.3.2	Classification of Species of Plants by XRF	224
11.3.3	Determining the Depth Distribution of Elements Using XRF	225
11.3.4	XRF Applied in Bio-medicine	227
	References.....	229
Chapter 12	Hyperspectral Technology.....	231
12.1	Introduction to Hyperspectral Technology.....	231
12.1.1	The Birth of Hyperspectral Technology.....	231
12.1.2	Present Situation of Hyperspectral Technology.....	233
12.1.3	Development Prospect of Hyperspectral Technology	235
12.2	Principle and Experimental System of Hyperspectral Technology.....	236
12.2.1	Experimental Principle of Hyperspectral Technology.....	236
12.2.2	Introduction to the Experimental System of Hyperspectral Technology.....	238
12.2.3	Features and Advantages of Hyperspectral Technology	239
12.3	Application of Hyperspectral Technology.....	240
12.3.1	Application of Hyperspectral Technology in Agricultural Science.....	240

12.3.2	Application of Hyperspectral Technology in Food Safety.....	243
12.3.3	Application of Hyperspectral Technology in Biomedicine.....	246
12.3.4	Application of Hyperspectral Technology in the Military Field.....	248
	References.....	248
Chapter 13	Spectral Fusion Technology and Application	252
13.1	LIBS and Raman Technologies	252
13.1.1	The Role of LIBS Technology and Raman Technology in the Application	252
13.1.2	Important Application Based on LIBS-Raman Technology	254
13.2	LIBS and LIF Technologies.....	261
13.2.1	The Role of LIBS Technology and LIF Technology in Application	261
13.2.2	Important Application Based on LIBS-LIF Technology.....	262
13.3	LIBS, Raman and IR Technologies	263
13.3.1	Advantages of Adding IR Technology to LIBS Raman Technology	263
13.3.2	Important Applications Based on LIBS, IR and Raman Technology.....	264
	References.....	267
Chapter 14	Intelligent Spectrum Based on Machine Learning.....	270
14.1	Introduction of Machine Learning and Intelligent Spectrum	270
14.1.1	The Origin and Development of Machine Learning.....	270
14.1.2	Introduction of Machine Learning Algorithms Commonly Used.....	270
14.2	Laser-Induced Breakdown Spectroscopy (LIBS) and Machine Learning.....	271
14.2.1	The Advantages of LIBS Combined with Machine Learning	271
14.2.2	Application of Machine Learning in LIBS	272
14.3	Infrared Spectroscopy (IR) and Machine Learning	279
14.3.1	The Advantages of IR Combined with Machine Learning.....	279
14.3.2	Application of Machine Learning in IR	280
14.4	Raman Spectroscopy and Machine Learning	285
14.4.1	The Advantages of Raman Spectroscopy Combined with Machine Learning.....	285
14.4.2	Application of Machine Learning in Raman Spectroscopy	286
14.5	Schematic of Hyperspectral Imaging (HSI) and Machine Learning.....	295
14.5.1	The Advantages of HSI Combined with Machine Learning.....	295
14.5.2	Application of Machine Learning in HSI.....	295
	References.....	310
Chapter 15	Simulation Spectrum Teaching Experiments	312
15.1	Spectral Simulation Software (GaussView & Gaussian).....	312

15.1.1	Introduction of GaussView & Gaussian.....	312
15.1.2	Molecular Structure Modeling by GaussView	314
15.1.3	Molecular Structure Parameter Adjustment	320
15.1.4	Calculation Settings of Gaussian.....	324
15.2	IR Spectrum Simulation Experiment.....	330
15.2.1	Introduction to Infrared Spectroscopy (IR Spectrum)	330
15.2.2	The Establishment of Water and Ethanol Molecular Structure.....	330
15.2.3	Calculation Parameters Setup for IR Spectrum	334
15.2.4	IR Spectral Analysis Simulation	335
15.3	Raman Spectrum Simulation Experiment	338
15.3.1	Introduction to Raman Spectrum.....	338
15.3.2	The Establishment of Oxygen and Ozone Molecular Structure.....	339
15.3.3	Calculation Parameters Setup for Raman Spectrum.....	342
15.3.4	Raman Spectral Analysis Simulation.....	343
15.4	UV-Vis Spectrum Simulation Experiment.....	345
15.4.1	Introduction to UV-Vis Spectrum.....	345
15.4.2	The Establishment of Benzene and Ethylbenzene Molecular Structure	346
15.4.3	Calculation Parameters Setup for UV-Vis Spectrum	347
15.4.4	UV-Vis Spectral Analysis Simulation.....	348
15.5	Simulation of the External Electric Field of Ethylbenzene.....	350
15.5.1	Research Significance and Background	351
15.5.2	Theory and Computational Method	351
15.5.3	Method and Basis Set Selection of EB.....	352
15.5.4	Effect of Electric Field on Bond Length and Energy of the Molecule	353
15.5.5	Effect of Electric Field on Distribution of Molecular Orbital Energy Levels	354
15.5.6	Effect of Electric Field on Infrared Absorption Intensity.....	356
15.5.7	Extension of Related Research (1) Tunneling Ionization	357
15.5.8	Extension of Related Research (2) Potential Energy Surface Scanning.....	358
15.5.9	Research Conclusions	360
	References.....	360
	Postscript	363
